

IDEA GENERATION

How might we design work where AI helps us see talent beyond the pattern without diminishing human agency and judgement?

BRAINWRITING

- ROUND #1 Write three ideas on the top row, one per box.
- ROUND #2 Pass the paper to the left and read the row above. Write three more: develop, combine, or write something new.
- ROUND #3 Pass it again and do the same on the last row.

Three minutes per round. Write silently. There’s no such thing as “wrong”, only ideas to build on.
